## CAREER OBJECTIVE

---

Aspiring Python Developer skilled in Python, JavaScript, and web development with a strong focus on problem solving. Passionate about building practical, user-centric applications and continuously learning modern tools and technologies. Committed to working on real-world projects, improving technical expertise, and growing through hands-on experience. Eager to collaboration and dedicated to delivering effective, solution-oriented results.

## EDUCATION

---

### Bachelor of Technology (B-Tech) – Computer Science (AI)

Madanapalle Institute of Technology & Science, Andhra Pradesh

2023 – 2027

### Higher Secondary Education (MPC)

Sri Siddhartha Junior, Madanapalle, Andhra Pradesh

2021 – 2023

Percentage: 94.2%

### Matriculation (SSE)

Vijaya Bharathi English Medium High School, Madanapalle, Andhra Pradesh

2020 – 2021

Percentage: 100%

## INTERNSHIP

---

### Full Stack Development Intern (with NLP)

Duration: 8 weeks

June 2025 – Aug 2025

- Gained hands-on experience in Python, JavaScript, API integration, text processing, and application development.
- Developed an AI-powered News Authenticity Detection System using Machine Learning and NLP techniques.
- Built a Recipe and Dish Chatbot capable of providing recipes, ingredients, nutritional information, and dish details through API integration.
- Collaborated on practical assignments and real-world problem-solving activities to strengthen technical and analytical skills.

## PROJECTS

---

### DineFlex | Node.js, Express.js, MySQL, HTML, CSS, JavaScript

- Developed a restaurant reservation system with table booking, online payments, email confirmations, and restaurant browsing features.
- Implemented secure authentication, role-based access control, and a Super User panel for managing restaurants, customers, bookings, and system operations.
- Integrated Razorpay for payment processing and Brevo for automated booking confirmations and user notifications.
- Built AI-powered assistants for users and administrators to handle restaurant queries, reservation support, and platform management tasks.

### AI Content Security System | Python, Flask, Machine Learning

- Developed a system to identify harmful content, suspicious keywords, and unsafe URLs in documents and images.
- Built a Fake News Detection feature to classify news articles as Real or Fake using Machine Learning.
- Implemented harmful content detection, URL scanning, and fake news classification to improve content security and reliability.
- Built a Flask-based web application with document analysis, image scanning, and automated security report generation.

## CERTIFICATIONS

---

- Machine Learning A–Z: AI, Python & R + ChatGPT Prize [2026] – Udemy
- Databricks Accredited Generative AI Fundamentals – Databricks Academy
- Full Stack Development with NLP Internship Certification – StudyOwl Education Private Limited

## ACHIEVEMENTS

---

- Winner, GUVI Hackathon 2026 – Awarded ₹10,000 cash prize.
- Top 15 Finalist, Make for Madanapalle Hackathon.
- Participated in the National Conference on Engineering, Innovation, and Management (Paper Presentation), 2025.

## TECHNICAL SKILLS

---

**Languages:** Python, SQL, JavaScript
